

# The How To Eat Pussy Guide - 15 Magical Steps

## 1: Tell her she is beautiful and mean it.

Most women are shy about their bodies. Even if you've got the world's most gorgeous woman in bed with you, she's going to worry about how you like her body. Tell her it's beautiful, tell her which parts you like best, tell her anything, but get her to trust you enough to let you down between her legs.

## 2 Stop and appreciate her unique flower

Now stop and look at what you see. Beautiful, isn't it? There is nothing that makes a woman more unique than her pussy. I know. I've seen plenty of them. They come in all different sizes, colors and shapes; some are tucked inside like a little girl's cuntie and some have thick luscious lips that come out to greet you. Some are nested in brushes of fur and others are covered with transparent fuzz. Appreciate your woman's unique qualities and tell her what makes her special.

## 3 Women are more verbal: Talk to her beautiful pussy

Women are a good deal more verbal than men, especially during love-making. They also respond more to verbal love, which means, the more you talk to her, the easier it will be to get her off. So all the time you're petting and stroking her beautiful pussy, talk to her about it.

## 4 Lick her outer lips, inner lips and find her clit

Now look at it again. Gently pull the lips apart and look at her inner lips, even lick them if you want to. Now spread the tops of her pussy up until you can find her clit. Women have clits in all different sizes, just like you guys have different sized cocks. It doesn't mean a thing as far as her capacity for orgasm. All it means is more of her is hidden underneath her foreskin.

## **6 Tease her & approach her pussy slowly**

When it comes to eating pussy take it slow, approach her pussy slowly. Women, even more so than men, love to be teased. The inner part of her thigh is her most tender spot. Lick it, kiss it, make designs on it with the tip of your tongue. Come dangerously close to her pussy, then float away. Make her anticipate it.

## **7 Play with her**

Now lick the crease where her leg joins her pussy. Nuzzle your face into her bush. Brush your lips over her slit without

pressing down on it to further excite her. After you've done this to the point where your lady is bucking up from her seat and she's straining to get more of you closer to her, then put your lips right on top of her slit.

## **8 Kiss her, gently, then harder**

Kiss her, gently, then harder. Now use your tongue to separate her pussy lips and when she opens up, run your tongue up and down between the layers of pussy flesh. Gently spread her legs more with your hands. Everything you do with a woman you're about to eat must be done gently.

## **9 Tongue-fuck her**

Tongue-fuck her. This feels divine. It also teases the hell out of her because by now she wants some attention given to her clit. Check it out. See if her clit has gotten hard enough to peek out of it's covering. If so, lick it. If you can't see it, it might still be waiting for you underneath. So bring your tongue up the top of her slit and feel for her clit. You may barely experience it's presence. But

## **11 Finger-fuck her with TWO fingers**

But back to your pussy eating session...There's another thing you can do to intensify your woman's pleasure. You can finger-fuck her while she's enjoying your clit-licking talents. Before, during or after. She'll really like it. In addition to the erogenous zones surrounding her clit, a woman has another extremely sensitive area at the roof of her vagina. This is what you rub up against when you're fucking her. Well, since your cock is pretty far away from your mouth, your fingers will have to do the fucking.

Take two fingers. One is too skinny and three is too wide and therefore can't get deep enough. Make sure they're wet so you don't irritate her skin. Slide them inside, slowly at first, then a little faster. Fuck her with them rhythmically. Speed up only when she does. Listen to her breathing.

She'll let you know what to do. If you're sucking her clit and finger-fucking her at the same time, you're giving her far more stimulation than you would be giving her with your cock alone. So you can count on it that she's getting high on this. If there's any doubt, check her out for symptoms.

## **12 Get to know her orgasmic symptoms to become even better**

How to eat pussy varies from woman to woman, as each woman is unique.

You may have one who's nipples get hard when she's excited or only when she's having an orgasm.

Your girl might flush red or begin to tremble.

Get to know her symptoms and you'll be a more sensitive lover.

## **13 Don't let go of her clit when she starts to orgasm – The Multi-Orgasmic Woman**

When she starts to have an orgasm, for heaven's sakes, don't let go of that clit. Hang in there for the duration. When she starts to come down from the first orgasm, press your tongue along the underside of the clit, leaving your lips covering the top. Move your tongue in and out of her cunt. If your fingers are inside, move them a little too, gently though, things are extremely sensitive just now.

If you play your cards right, you'll get some multiple orgasms this way. A woman stays excited for a full hour after she's had an orgasm. Do you realize the full impact of that information? The potential? One woman was clocked at 56 orgasms at one sitting. Do you know what effect you would have on a woman you gave 56 orgasms to? She'd be yours as long as you wanted her.

## **14 The cherry on the cake**

Some women like to have their man rub and enter their anal section with their finger while they are being eaten out!

## **15 After the orgasmic wave: Keep making love to her quietly**

The last advice I have for you is this:

After you've made her come, made her your slave by giving her the best head she's ever had, don't leave her alone just yet. Talk to her, stroke her body, caress her breasts. Keep making love to her quietly until she's come all the way down. A man can get off and go to sleep in the same breath and feel no remorse, no sense of loss. But a woman by nature requires some sensitivity from her lover in those first few moments after sex.

**Oral sex can be the most exciting sexual experiences you can have. But it's what you make it. Take your time, practice often, pay attention to your lover's signals, and most of all, enjoy yourself.**
